## About us:

Contra Technology Is a leading distributor and supplier of quality video surveillance, access control, NAS storage, Fire Alarm, Fire Fighting, Telecommunication equipment, queuing system, intrusion and public address. Since our founding in 2012, we have been providing highly developed, competitively priced, integrated security solutions. With our dedication to quality and attentive customer service, we excelled in market cutting-edge products that take conventional security to a new level..

The company is specialized in:

- Trade & Agencies
- Integrated IT systems
- Quality testing and calibration

## Our Vision:

Striving to be one of the largest companies specialized in technology industries across the Arab region, we provide the highest levels of service and performance in our projects and have become a hallmark in the market. In addition to excellence in providing sales services to individuals and businesses, we aspire to be the company name synonymous with quality and exceptional services

## Our target:

Not to be become a mere followe but a pioneer in our field. And to continue our growth, always offer our valued customers attractive and exciting quality products at the most competitive price.

## Values:

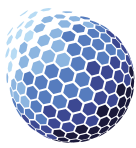

The most important values of our company:

- Total customer satisfaction.
- Continued development of our products.
- Trust, loyalty, commitment and credibility.
- Justice and fairness.
- Creating a positive work environment for our employees.
- Duty and responsibility towards our society.
- Innovation and creativity.
- Execution and delivery of the highest quality standards within the required period.

## Our Mission:

Our company strives to maintain customer satisfaction through the provision of high quality services by focusing on the expectations and needs of the client, as adapted to the company during its growth with the requirements of both customers and employees. As the company logo (High quality with the best performance).

## Testing and quality:

Our company uses a variety of testing devices for information networks to identify any problems or errors in the networks. The speed of processing is the most important equipment tests we possess (Fluke Networks). Through these devices, we issue/obtain certificates for information networks through a DTX-1800, which is investigated independently by ETL to meet all ISO & TIA tests accurately.

Fluke Networks TS100 PRO

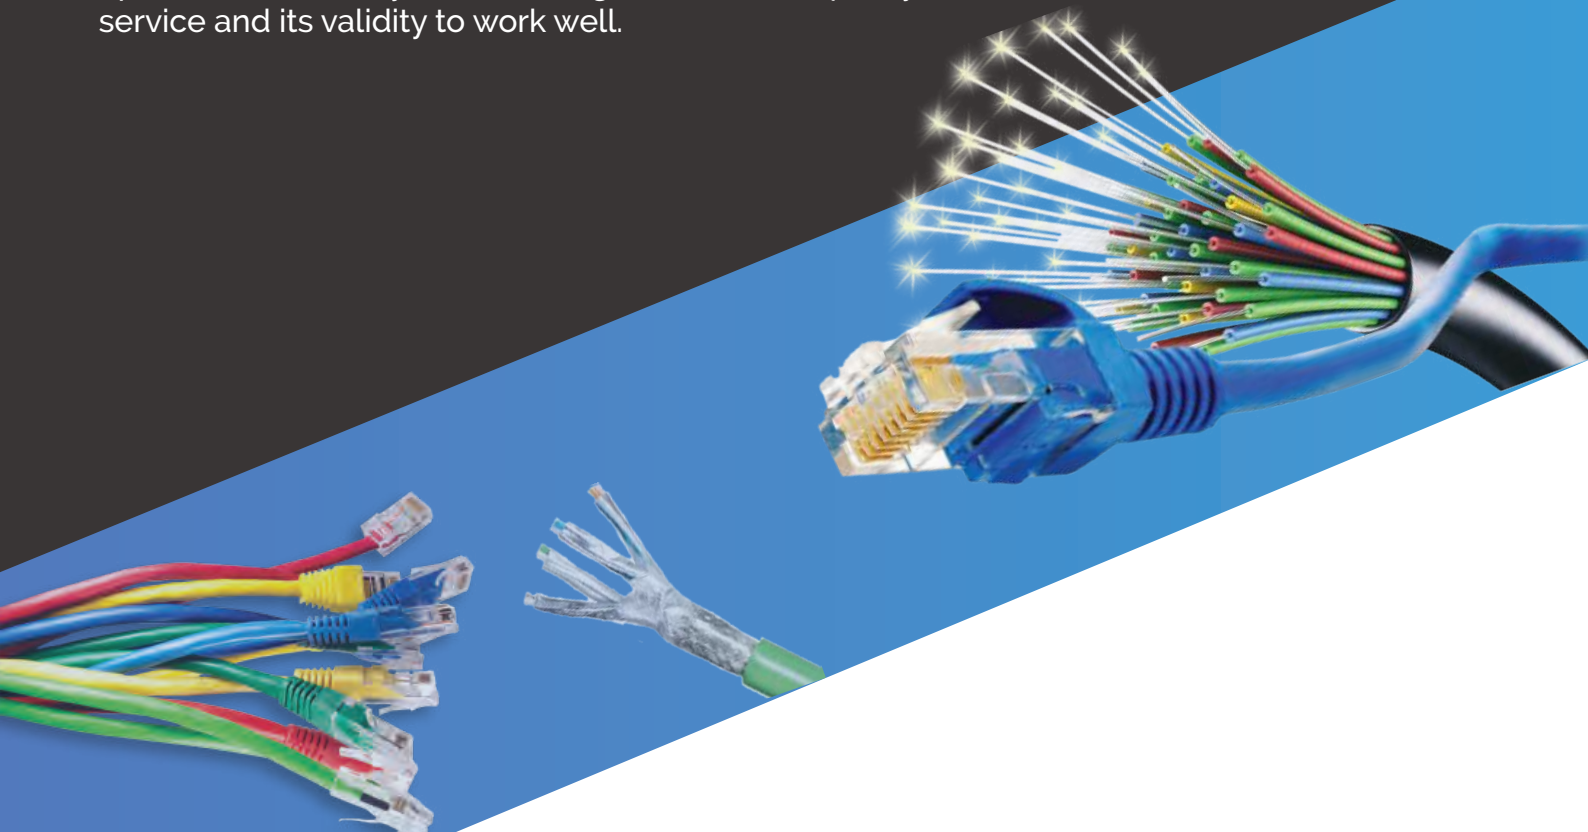

Fluke Networks TDX-1800

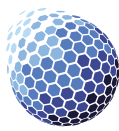

Fluke Networks Link Runner Pro

Fluke 411D Laser Distance Meter

## Network Infrastructure

Defined by providing the best designs, work with the highest quality cable types in executing internal networks. We are using cables of types (Cat 5/6 / 6a Fiber) to connect multiple data as (Data, voice and image). We ensure the continuity of the network operation under any conditions, guarantee the quality of network service and its validity to work well.

## Surveillance Cameras

---

**ACTi**  
Connecting Vision

**AXIS®**  
COMMUNICATIONS

Surveillance Camera systems are most important security systems and follow-up in the world right now and is characterized by a system of security and protection by linking system storage, this ensures the storage of all events recorded from day one and up to a full year also features a system with high quality pictures, sounds and the possibility to take pictures when intrusions happen at any time and there is a large number shapes that are putting together internally and externally and the possibility of putting together anywhere no matter the distance as you can see the cameras via the Internet

Our company is characterized depending on the types of global television surveillance system and provides all the solutions in this area of the supply, installation and training on these systems

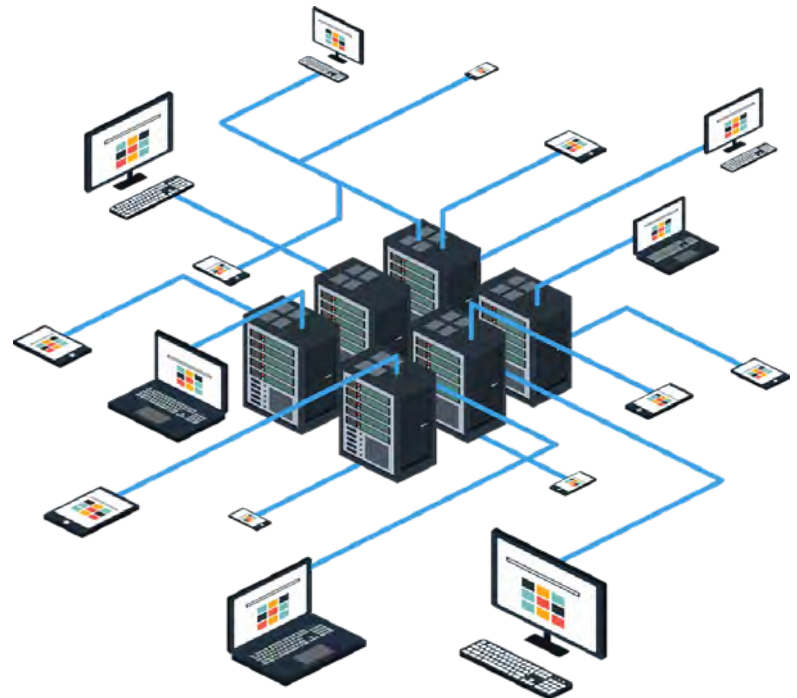

## Network-attached storage

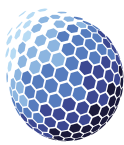

storage devices through networks latest types of storage and maintenance of information , because of their ability to add modules of storage , it helps in keeping its data and access it from many devices connected to the internal network or via the Internet as these devices offer many services such as service data encryption and monitor the status and temperature of hard drives and storage direct from surveillance cameras and can be delivered on the display screens and open what's inside is deliberate on any computer

# Synology®

## Network Attached Storage

# QNAP®

QNAP is the leading storage expert, and now produces innovative networking solutions for small businesses and enterprises. With a QNAP switch you can build a scalable and secure high-performance network at a cost-effective price. When implementing plans for digital transformation, smart edge computing, and high-bandwidth applications, trust QNAP to provide you with fast data transfer for seamless workflows and enterprise growth.

## Diverse & Cost-efficient

The QNAP switch family is available with 2.5Gb, 10Gb, 25Gb and even 100Gb to provide flexible and cost-efficient network upgrades.

## Innovative & Secure

QNAP is dedicated to providing innovative and secure network products, and provides the option to upgrade a QNAP switch to become a cybersecurity appliance for early network detection and response against malware attacks.

## Enterprise networking infrastructure solutions

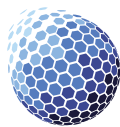

Teltonika Networks offers a wide array of networking products designed to make your connectivity reliable, secure and quick to deploy. Our products will help you build a solid IoT, M2M or enterprise networking infrastructure and advanced remote management capabilities will enable you to manage it with ease. If you cannot find a product that you need or if you are looking for something special, contact us as we might already have the solution

### Manufactured

All Teltonika Networks devices are manufactured and assembled in our leading-edge manufacturing facility in Molėtai, Lithuania. Having in-house manufacturing allows our engineers to ensure the highest quality of all our products. Every single piece is extensively tested before leaving our warehouse. functionality.

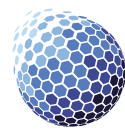

## Rack Cabinet

Our company is characterized based on the best types of information booths that are imported from abroad to work omitted in all our projects as Defined by the presence of the best designs and all sizes that serve no information network

**CANOVATE®**

## Intrusion Alarm Systems

The security of your people and facilities depends on your system's ability to quickly detect and communicate an intrusion anytime and anywhere it occurs. Motion sensors and window contacts and Glass breaker detectors automatically send alarms to command center when an intrusion event occurs in a secured zone.

Intruder detection systems are an integral element in your security management system, Security performance enhancements and cost savings can be achieved by combining intrusion alarm systems together with video surveillance and access control.

Our company is characterized by depending on global types of intrusion alarm systems and providing all the solutions in this field like supply, installation and training on these systems

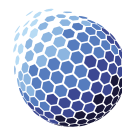

## FIRE FIGHTING SYSTEMS

Protection of valuable resources and critical facilities of your business is our focus. We Offer a full range of fire suppression for industrial, commercial, and special hazard applications. Our fire protection systems are effective, easy to use, and safe for people, key assets, facilities and the environment. Suppression systems use a combination of dry chemicals and/or wet agents to suppress fire. Suppression systems have become a necessity to several industries as they help control damage and loss to equipment.

## Public Address System:

A public address system (PA system) is a sound amplification system used to allow a person or people to address an audience at a greater volume that wouldn't be possible or feasible without such a system. At a minimum, such a system comprises a microphone, an amplifier and a loudspeaker. Examples of content include announcements and other audio material at sports stadiums, air and rail terminals, and the sound produced by a singer, musician or musical ensemble, as well as recorded music. A PA system may include multiple microphones and/or other sound sources, a mixing console to combine and modify multiple sources, and multiple amplifiers and loudspeakers for louder volume, greater coverage and/or wider distribution, such as that required to provide sound throughout an entertainment venue, an office building or retail space, or an outdoor environment.

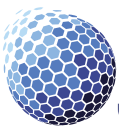

- IP BASED PA SOLUTION
- SOFTWARE BASED PA SYSTEM
- MATRIX
- PAGING MICROPHONE
- MIXERS
- POWER AMPLIFIERS
- AMP. CHANGEOVER & MONITORING
- SELECTOR & DATA DECODER
- POWER SUPPLIES & DISTRIBUTION
- VOLUME CONTROLLER / PATCH
- SPEAKERS

# PBX Phone System

PBX stands for Private Branch Exchange, which is a private telephone network used within a company or organization. The users of the PBX phone system can communicate internally (within their company) and externally (with the outside world), using different communication channels like Voice over IP, ISDN or analog. A PBX also allows you to have more phones than physical phone lines (PTSN) and allows free calls between users. Additionally, it provides features like transfer calls, voicemail, call recording, interactive voice menus (IVRs) and call queues.

## Nurse Call System

Nurse Call System is a nursing communication & management system using IP technology that can be used for both wired and wireless connections. The features of this system make it ideal for use in hospitals,

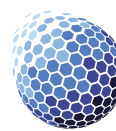

- Increases the safety and comfort of patients and residents
- Optimizes the work of nursing staff
- Care work management
- IP technology Convergence of communications and ease of installation and maintenance.
- Wired & Wireless System
- Adaptability and Extensibility
- Room control

## People Counting Solutions

Every business with a physical space should count customer traffic in order to see the bigger picture of what is going on in their business. Whether you are a shopping center, retail chain, museum, library, sporting venue, bank, restaurant or other... People Counting data will help you make well informed decisions about your business.

Benchmarking businesses, figuring out the conversion rate for each spot to see the real performance, efficiently allocating your staff according to hourly visitor traffic will create value in terms of revenue, profit and efficiency.
