Short Description

Synology 4 Bay DVA Deep Learning Video Analytics DVA3221 (Diskless)

Description

Smarter surveillance

Combine the comprehensive video management features in [Synology Surveillance Station](#) with advanced analytics to speed up incident response and collect better business intelligence.

AI-powered insights

Bolster the security of your premises while increasing efficiency.

Versatile monitoring

Watch over your deployment in the way that works best for you.

Easy deployment

Quickly set up your surveillance system with minimal effort.

Advanced analytics platform

Monitor and secure your premises more effectively with locally processed analytics, ensuring security and confidentiality.

Deep Learning NVR Series

People & Vehicle Detection

Trigger immediate or threshold-based alerts using idle times within defined zones for people or vehicles.

License Plate Recognition

Intrusion Detection

People & Vehicle Counting

Congestion Alerts

Face Recognition

Face Covering Detection

Flexible monitoring capabilities

Leverage highly configurable options and automation features to act quickly when potentially dangerous situations arise.

Map-supported alerts

Display real-time previews of detected events on interactive multi-floor and multi-site maps supported by Google Maps and OpenStreetMap.

Automation rules

Reduce workloads by triggering responses to specific situations, such as activating recording when a microswitch detects a door is opened.

Notifications

Specify which events should trigger a notification, and whether to receive alerts by SMS, email, or push notification on mobile devices.

Comprehensive access options

Enjoy a uniform monitoring experience wherever you are and adapt your surveillance

system to your needs — not the other way around.

Space-saving installation

Minimize the footprint of your monitoring setup. The DVA1622's local management capabilities make it an ideal solution for compact home surveillance systems and security kiosks when available space is limited.

High definition video output

Connect an external display directly to the built-in HDMI port to start monitoring your premises in minutes.

Local management

Control your Surveillance Station installation without setting up a dedicated PC by attaching a mouse and keyboard directly to the DVA1622.

Anytime, anywhere surveillance

Investigate incidents from anywhere to minimize reaction times and take appropriate action faster.

Multi-platform support

Monitor streams in real time or browse recorded footage seamlessly from browsers, desktop clients, and mobile apps.

Monitoring on the go

Install the DS cam app on your iOS and Android mobile devices to always have a monitoring option on hand.

Deploy and protect with ease

Get large or multi-site surveillance systems up and running easily while keeping recordings safe from malfunctions and third-party attacks.

Wide compatibility

Pick from 8,300+ Synology-validated models or leverage ONVIF support for even more flexibility.

Multi-site management

Manage fleets of recording servers from a single interface.

Granular delegation

Distribute monitoring and managing privileges flexibly.
