Short Description

QNAP TS-673A 6-Bay AMD Ryzen Quad-Core 2.5GbE NAS with QSW-1105-5T 5-Port 2.5GbE Unmanaged Switch

Description

Bye-bye Gigabit, hello 2.5GbE.

Gigabit Ethernet isn't fast enough to unleash your 2.5G LAN and WAN devices.
Upgrade to a 2.5G switch now!

ISPs offer Multi-Gig internet for homes

Many ISPs have started delivering multi-gigabit fiber to the home (FTTH) customers, providing speeds exceeding that of standard gigabit ethernet.

Multi-Gig enables Wi-Fi 6

Wi-Fi 6 (802.11ax) routers or APs require multi-gig network devices to unleash optimal wireless performance.

PC / laptops adopt 2.5G ports

Modern PCs and laptops have adopted 2.5G ports to fulfill high-bandwidth demands of streaming, video calls, gaming, and other modern web services.

Make your work and life smooth with the high-speed Switch and NAS

QNAP helps you upgrade to a high-speed network and data storage center in your home or office, providing a full 2.5G network experience.

Flash sale! QNAP's most cost-effective 2.5GbE solution

Why 2.5G? Cost-effective high-speed option.

If you can't budget a 10GbE upgrade at this time, the more affordable 2.5GbE provides a notable improvement in current Ethernet speeds. Use existing CAT5e cables to upgrade 2.5GbE network without stretching your budget.

Why QNAP 2.5G solution? More cost-effective solution.

The lack of consumer-grade switches has made it hard for home and personal users to adopt 2.5GbE/5GbE networking. QNAP now offers cost-effective 2.5GbE switches, helping you to transform your home network at a wallet-friendly price.

Why now? The most cost-effective timing.

QNAP now hosts a flash sale for the 2.5GbE NAS and Switch Bundle. Buy now!

TS-673A

AMD Ryzen™ Quad-core multi-tasking 2.5GbE NAS

TS-673A not only provides a secure and reliable storage solution for backing up all your files, but also supports running multiple VMs and containers for diverse applications.

Two 2.5GbE ports can be combined for bandwidth for up to 5Gbps!

Multi-tasking AMD Ryzen™ 4-core/8-thread 2.2 GHz processor

8GB RAM, supports up to 64GB RAM (ECC memory also supported)

Add more 2.5G/10G ports via PCIe network cards

Supports entry-level graphics cards to boost performance for video transcoding or VM output

Install two M.2 NVMe SSD (sold separately) for faster data accessing or image recognition

Three USB 3.2 Gen 2 (10Gbps) ports and one USB 3.2 Gen 1 (5Gbps) port allow faster backup to/from USB devices

Add an additional twenty-four hard drives by connecting to multiple storage expansion units

Smart storage • Simple backup • Easy management

TS-673A helps you easily back up, search, share and manage all your files and data.
Super!

Storage protection

RAID protection

QNAP NAS supports various [RAID types](#) that provide varying levels of performance and data redundancy.

Volume and LUN snapshots

[Snapshots](#) record the complete status of your NAS system and data. Certain data and files can be reverted when needed. It's the best way to recover your files from ransomware.

Flexibly expand storage space

The TS-673A supports a storage capacity of up to 100 TB by installing six 3.5-inch 22 TB hard drives in RAID 5. By connecting to [QNAP storage expansion units](#), you can add additional storage space to meet growing storage requirements.

Mount cloud storage

[HybridMount](#) allows you to mount cloud storage and file servers on your NAS and centrally manage file access. Local caching for cloud data can be enabled to provide near-LAN access speeds.

Diverse backups

Back up devices

Easily back up from [PC/Mac](#) or File servers supporting Rsync, FTP and CIFS to NAS. Then use [Hybrid Backup Sync](#) to back up data to another remote NAS or cloud based on the 3-2-1 backup rule.

Back up services

Back up diverse services to NAS, including [VMware® and Hyper-V™ VMs](#), [Google™ Workspace](#) and [Microsoft 365® business account data](#), [WordPress](#) and [Google Photos](#).

Back up NAS data to the Cloud

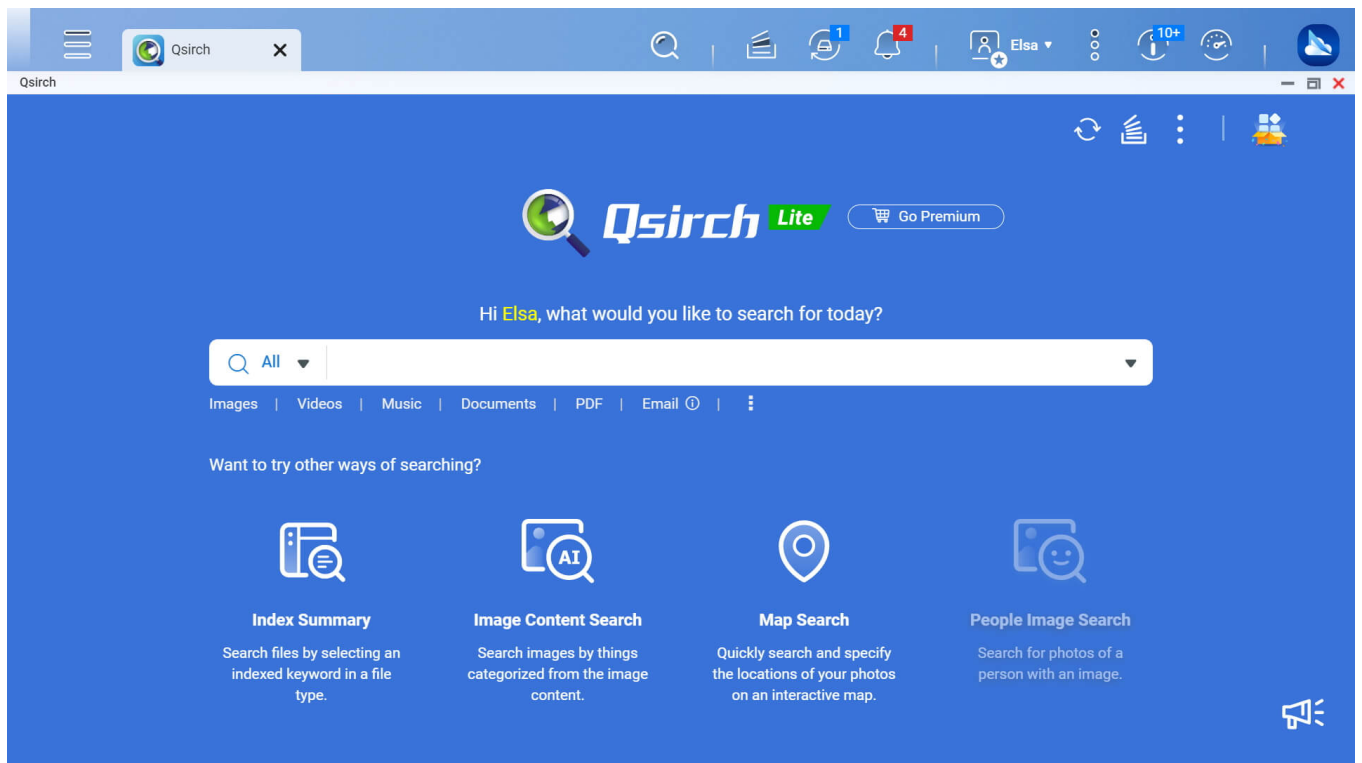

[Hybrid Backup Sync](#) supports mainstream public cloud services for backing up or syncing data from NAS to Cloud.

Boost production efficiency

Search NAS files quickly

Powerful [Qsirch](#) full-text search engine allows you to quickly find documents, media files, and emails using keywords, colors, or faces. AI OCR image recognition technology recognizes and captures text inside images.

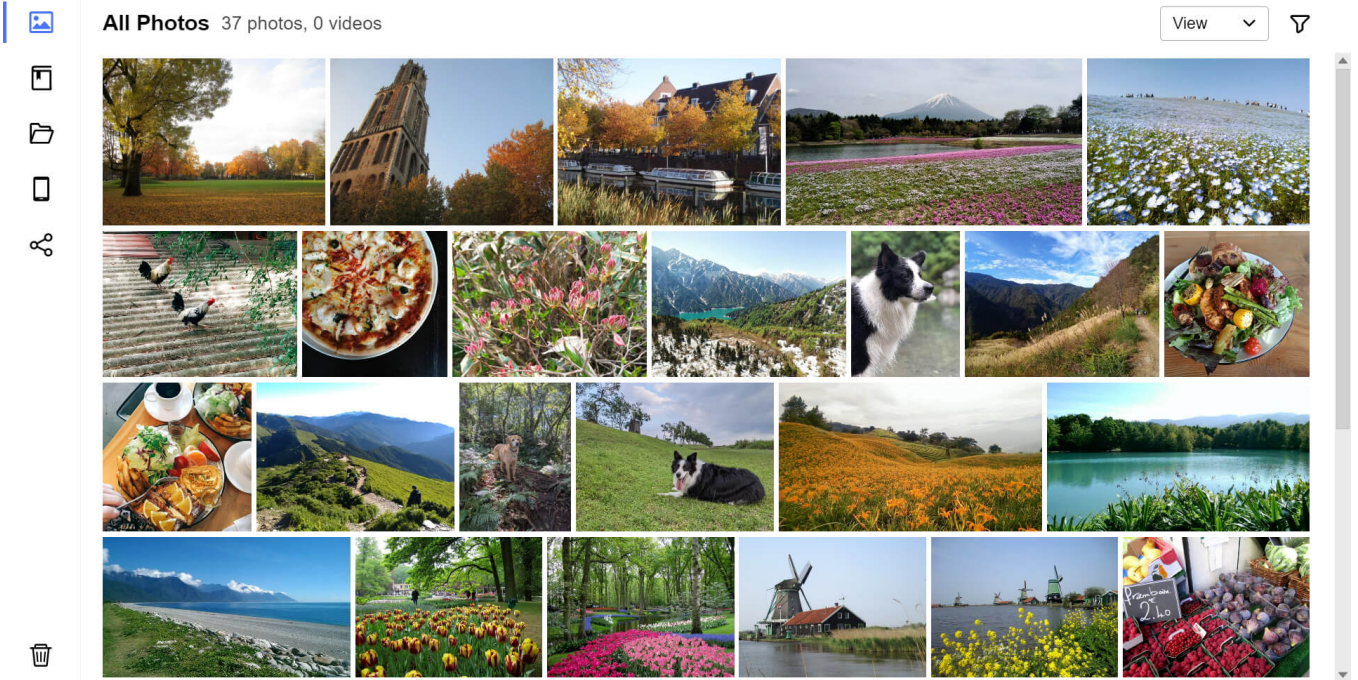

Auto-sync files

[Qsync](#) allows you to sync files between NAS and multiple computers or mobile devices via one-way or two-way sync.

AI photo management

Large-capacity NAS leverages the powerful AI photo management app [QuMagie](#) and creates smart photo albums based on people, objects, locations, and events, making photos easy to find and share.

QTS 5 empowers VM, surveillance and cybersecurity deployment

The QTS 5 operating system provides a next-generation data storage usage experience with optimized user interface.

Run VMs and containers

By running multiple virtual machines and containers on the TS-673A, you can deploy multi-tenant environments and applications to increase management efficiency and reduce hardware costs.

Predict drive life with AI

QNAP's AI-based drive health analysis technology, and automatic RAID disk replacement with spares, ensures a reliable storage environment.

All-in-one surveillance

QNAP's integrated surveillance NAS solution offers a subscription licensing solution or perpetual licensing solution for flexible deployment based on your needs.

All-in-one surveillance

QNAP's integrated surveillance NAS solution offers a subscription licensing solution or perpetual licensing solution for flexible deployment based on your needs.

QSW-1105-5T

Affordable 5-port 2.5G switch

Enjoy 2.5x high-speed transmission by connecting more 2.5G devices, such as, NAS, Wi-Fi 6 Router/AP, PC/laptop, etc.

Five 2.5G NBASE-T ports for unleashing LAN/WAN 2.5Gbps potential

Supports auto-negotiation, backward compatible with 1GbE devices

Use existing Cat 5e cables

Hassle free plug and play

Fanless design with ventilated construction for near-silent operation

Automatic loop detection and blocking to ensure continuous network operation

Enjoy 5Gbps speeds without an extra network card

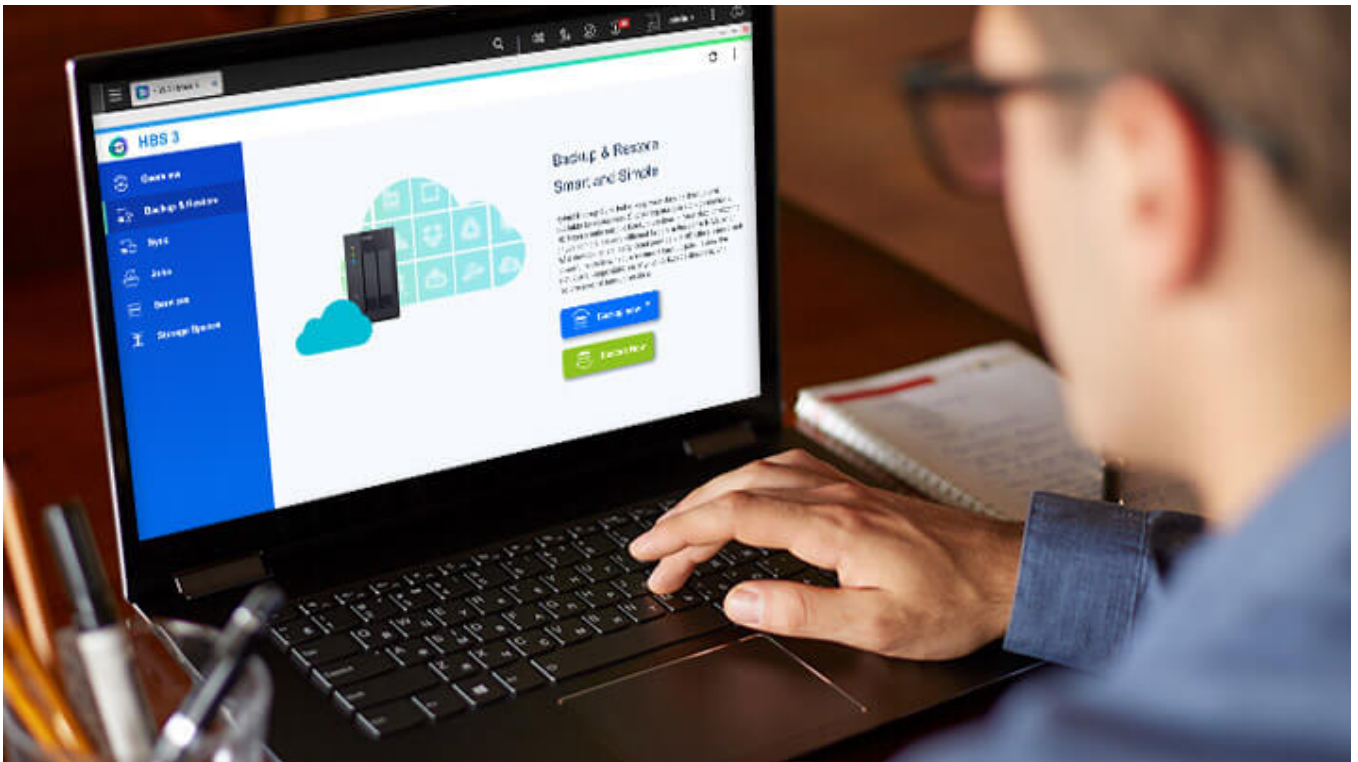

Enable SMB Multichannel on TS-673A NAS to combine two 2.5GbE ports for up to 5Gbps transmission speed. This increased bandwidth greatly accelerates large file transfer/backup and video editing applications.

Deploy 2.5GbE network environment to boost application efficiency

Faster Backup and Restore

Increased transfer speeds help save time when backing up files to NAS, or when backing up using [HBS \(Hybrid Backup Sync\)](#).

High-quality Video Streaming

Higher bandwidth improves the playback quality of 4K/8K videos.

Gaming Storage

Mount an iSCSI LUN from a 2.5GbE NAS to your computer to store your vast game collection. [Gaming x 2.5GbE NAS Solution](#)

Smooth Video Calls

In the era of remote working and classes, a faster network provides high-quality live streams for video calls and online courses.

RAID Group

??

To ensure data security, system stability, and storage performance, the maximum number of drives for a single RAID group is now 16 (applicable to RAID 5, RAID 6, RAID TP, and subgroups of RAID 50 and RAID 60). Nevertheless, users can combine multiple RAID groups into a large storage pool that contains more than 16 drives, using RAID 50, RAID 60, or RAID 10 as the RAID configuration. This enhancement will only be applied to new RAID groups. All existing RAID groups and storage systems will not be affected.
